

What are Intensive In-Community (IIC) Services?

Intensive In-Community (IIC) Services is a government-funded program facilitated by PerformCare.

IIC Services allow struggling children and adolescents to receive short-term clinical interventions when outpatient therapy is not sufficient to address their acute behavioral and emotional challenges.

How can IIC services help my child?

- Your child can receive up to 2 hours of therapy per week at no cost to you.
- Sessions can take place in the home or community.
- Our licensed providers are experienced and sensitive to your cultural needs and values.
- Services are individualized and goal-oriented to allow for targeted interventions. Our all-inclusive approach incorporates working with both the child and family members.

How do I know if my child is eligible for IIC services?

To receive services, your child must meet the criteria below:

- ✓ Your child or adolescent is between the ages of 5-21 years old.
- ✓ Your child or adolescent is struggling with a mental health or behavioral crisis that is disrupting day-to-day functioning.
- ✓ Mental health challenges include, but are not limited to:

- Anxiety
- Depression
- OCD
- ODD
- ADHD
- Grief
- Trauma
- Parenting
- Family Dynamics
- School-related challenges

How do I get started?

- Call PerformCare at **1-877-652-7624**
- Based on your child's needs, the representative will link you with the appropriate services.
- An in-home assessment will take place along with an assignment of a care manager for ongoing coordination of services.
